SUPERINTENDENT'S REPORT.

To the Members of the School Committee of Sandwich:

In this report your superintendent tries to outline briefly his work during his six months of service and to make recommendations for the coming year.

CONDITION OF THE SCHOOLS.

There is a great difference in the condition of the schools. The graded schools generally are doing work of which the town need not be ashamed, when comparison is made with towns of equal circumstances. The ungraded schools on the whole are doing work of an inferior character, although your superintendent is always pleased by what he sees in some of these little schools. It is believed that in time our graded school can be made as efficient as any school in the large towns; and, while it is not thought the same can be said of the ungraded schools, the improvement made in some where the teachers are quick to act upon suggestions, gives your superintendent courage for the future. At the best improvement must be slow. Your superintendent has often found it hard to hold himself back, but he believes that the wisest policy is for him to observe carefully, form his opinions deliberately, and to thoroughly study his remedy before attempting to apply it, as a mistake in the schoolroom often means the lifelong injury to some growing mind. The

teachers of the town are, in the main, faithful. They have sought professional books eagerly, and this has led your superintendent to take steps to raise money for a library of professional works, which he hopes will soon be ready.

CONSOLIDATION.

July 1, 1892, the committee voted that "the Jarvesville School, Intermediate Grade, be consolidated with the schools at the center of the town, under the supervision of the superintendent." In accordance with this order the superintendent closed the Jarvesville Intermediate school. Your superintendent believes that the West Primary might be consolidated with the School Street schools without in any way injuring the schools. The location of the West Primary is a poor one and the building is in need of repairs. The schools in the south part of the town are small, and it would undoubtedly be well if consolidation could be made; but your superintendent fails to see how much money could be saved, for the distance is too great for children to walk from one district to another.

VISITS.

Since the opening of school in October, your superintendent has made one hundred and sixty-two visits averaging about an hour each. Of these seventy-eight have been in the town of Sandwich. During these visits he has listened to two hundred and thirty-six recitations and has himself conducted ninety-six exercises. Of these, ninety-nine recitations and thirty-eight exercises have been in Sandwich. He has also taken the place of the teacher three half days. He has made what he considered helpful suggestions after most of these recitations and his exercises have been given mainly to show the teacher what he considered a correct

method. A reference to the table annexed will show the distribution of visits, etc., among the various schools.

TEACHERS' MEETINGS.

Since the opening of school in October regular monthly teachers' meetings have been held, three in Sandwich and three in Bourne, the time taken being Saturday morning. Each meeting consists of two parts. First, the special work for the coming month, and secondly, some subject considered in full by the superintendent. The subjects thus far have been Reading, Language and Grammar, and The Recitation. The teachers have gratified your superintendent by referring to them often. He would feel still further pleased if the citizens would feel free to come in to see what is being done.

COURSE OF STUDY.

The teachers and your superintendent have often been discouraged in trying to raise the standard of the schools. The course of study adopted by the committee is believed to be a good one. Defects have been found and changes will be needed, but they are slight. It is not an easy matter to adapt a course of study to an ungraded school, where the tendency has been to allow a child to advance rapidly in those studies for which he has a natural ability and to fall behind in all subjects that are distasteful to him. The idea of the course of study is to so guide the teacher that she shall train her pupils that they may develop evenly. It will probably be a work of two or three years to grade the schools as they should be without doing a positive injury to some.

ATTENDANCE.

The average attendance as given in the last report was 90 per cent. This is the average of the county, but consider-

ably below what it should be in a town like Sandwich. Even with the best of systems and teachers the work must be retarded by continual absence. Your superintendent believes that some radical measures are needed to produce reform in this matter. The excuses given for absence are usually trivial.

RECOMMENDATIONS.

According to the Public Statutes, Chap. 48, Sect. 14, Barnstable County may unite with the counties of Norfolk, Bristol and Plymouth in maintaining a truant school. These three counties have so united. By Sect. 10 of same chapter all towns must name some truant school. Under the present system the individual towns must pay for truants. If the county united, as it may, the expense must be borne by the county. If three towns of the county instruct the County Commissioners to so unite, they must. Your superintendent would recommend that Sandwich instruct the Commissioners of Barnstable County to unite with the counties of Norfolk, Bristol and Plymouth in maintaining a truant school.

It is recommended that all school bills be approved by the chairman of the committee, by the superintendent, or by a finance committee before being presented to the selectmen for payment.

Your superintendent believes that too large a proportion of the present school appropriation goes into the high school. He believes that the town should do nothing to cripple the high school service; but he believes that with great care good service may be maintained there and the expenses decreased some three hundred dollars. He does not object to the salaries now paid, but does feel that the other teachers are not getting their share.

It is recommended that the sum of four thousand, six hun-

dred and fifty dollars be raised by the town for the support of the schools the ensuing year.

Respectfully submitted,

ELMER L. CURTISS.

THE PUBLIC LIBRARY.

REPORT OF SECRETARY OF TRUSTEES.

In accordance with the requirements of the State law, I herewith present the second annual report of the condition and needs, together with the receipts and expenditures, of The Sandwich Free Public Library for the year ending December 31, 1892.

The year covered by this report has been a very satisfactory one.

The new room in the Town Hall building, which was made large enough for library and reading room, is a pleasant and homelike room with excellent light. It will meet the requirements of the future growth of the Library for many years.

Mrs. C. L. Norton kindly gave the lamps and fixtures for the new room; and the attractiveness of the room is enhanced not a little by the fine etchings which hang on its walls, the gift of Miss Bessie Norton.

THE CIRCULATION AND NEW BOOKS.

The circulation for this year has been very large when the small number of books contained in the Library is considered. As will be seen by appended statistics, it has greatly increased over last year, and the demand for more books is constantly increasing. No new books have been

purchased this year, but by the time this report appears the trustees hope to have added at least one hundred and twenty-five volumes. A like, if not a larger number should be added during the coming summer, and we trust that the town will be as liberal as possible in its appropriation for the increase of its Library.

The books in the Library are divided as follows :

Fiction,	58 per cent.
Historical,	15 “
Scientific,	1.6 “
Biographical,	8 “
Travels,	7 “
Poetical,	1.4 “
Miscellaneous,	9 “

To obtain the circulation in each of the departments for the year I took one page of the charge book for each of the first ten months and I find the following proportions :

Fiction,	86 per cent.
Historical,	2.5 “
Scientific,	1 “
Biographical,	3.75 “
Travels,	1.8 “
Miscellaneous,	4.95 “

The works of Miss Muloch, Tourgee, Howells, Crawford, George Eliot, Capt. King, Hale, Mrs. Barr, Miss Alcott, Bynner, Besant and Rice, Mrs. Austin, and Chas. Reade, are seldom left on the shelves.

READING ROOM.

Through the interested efforts of Col. Charles L. Norton a table was placed in the library room on which can be found the best magazines and papers, for the benefit of all who may wish to read.

Most of the trustees give regularly, at their own expense, some magazine or paper. The list at present includes the following :

Cosmopolitan.
 Century Magazine.
 Christian Union.
 Harper's Magazine.
 Harper's Weekly.
 Harper's Young People.
 New England Magazine.
 Outing.
 Scribner's.
 Youth's Companion.

Early in the year the trustees made a rule to allow the teachers in the public schools to take three books at any one time for use in their respective schools.

The vacancy on the Board of Trustees caused by the death of that earnest friend of the Library, Mr. James Shevlin, was filled by the election of Col. Charles L. Norton.

Miss Carrie R. Crocker being obliged by illness to resign the office of librarian, Miss Della R. Baker was elected to that position and is discharging its duties most satisfactorily.

The town is indebted* to the following for gifts of money :
 Asa S. Wing of Philadelphia.

Col. Norton, for proceeds of lecture on "Old Sandwich, England," delivered at the request of the trustees.

First Parish Unity Club.

And to the ladies who interested themselves in raising money by a cake sale in the library room.

LIBRARY STATISTICS.

Whole number of books,	702
Whole circulation,	7,570
Increase over last year,	731
Weekly average,	145.58
Increase over last year,	28.12

Number of cards issued,	468
Increase,	168
